HANDS-ON FILLER & BTX TREATMENT
(1 patient for participant)

DEMO of filler and botulinum
toxin treatments

Course topics:

Theoretical part:

How to integrate Facial Aesthetics and Cosmetic Dentistry: a new approach for dental treatments. Aesthetic first consultation:

- Facial Analysis: important aspects
- Aging and face anatomy
- Techniques and materials: a review

Full approach to facial rejuvenation:

- Biorevitalization with hyaluronic acid
- Focus on treatment with dermal filler: full face approach, treatment of lips
- Biorivolumetria: an innovative category of injective treatments for complete rejuvenation of the face, by correcting volume and tissue restructuring

The use of Botulinum Toxin for facial rejuvenation and for dentistry:

- Mimic muscles and skeletal of the face
- Preparation of botulinum toxin (Botox & Xeomin)
- Informed Consent for patients
- Injection Techniques mapping and personal techniques.

We provide:

- Tutor and assistants
- All the product (filler, botox and materials) used during the courses (including model for the "hands-on" session for each doctor)
- Coffee Break and lunches
- Certificate issued by International Academy of Aesthetic Medicine Milan (IsoMed)

Partner
